My World

3 Doors Down

Your stuck on a chain And your toeing a lie Seems like everytime that you catch up You only fall behind

And your trapped inside this world you made yourself But that's not the world I live in This is not the life for me Cause my world is bigger than your problems And it's bigger than me That's not the world I live in This is not the life for me Cause my world is bigger than your problems And it's bigger than me

There is always someone to blame For the things you do yourself You think that everything that's going wrong Is because of someone else

And your trapped inside this world you made yourself That's not the world I live in This is not the life for me Cause my world is bigger than your problems And it's bigger than me It's not the world I live in This is not the life for me Cause my world is bigger than your problems And it's bigger than me [2x]

Cause I'm on the outside and I'm looking in

And that's not the world I live in This is not the life for me Cause my world is bigger than your problems And it's bigger than me It's not the world I live in This is not the life for me Cause my world is bigger than your problems And it's bigger than me Cause my world is bigger than your problems And it's bigger than me...
