

# Been To The Future

3

She  
Lives by the virtue of daytime TV  
Alone in a suburb  
And he  
Fills up a bottle  
And drinks from the sea  
He'll always be thirsty  
And they  
Shiny examples of human decay  
Come here, let me show you  
How I woke up this morning  
Still mourning a dream

I've been to the future  
I've been to the future

I hear  
Somewhere the circus  
Is said to be near  
Another distraction  
And I fear  
Will you be next to me  
This time next year  
Or will you be over?  
But wait  
Just as you leap  
From the nest for the wind  
Well I never told you  
When you woke up this morning  
You spoke of a dream

You'd been to the future  
I've been to the future  
Been to the future  
Been to the future

Repeat after me  
She's all I have  
Is this what it means to be free?  
Repeat after me  
She's all I have  
Tell me why  
She's all I have  
Please tell me why  
She's all I ever had

Today  
All the illusions are fading  
Away  
I've drawn my conclusion

Been to the future  
I been to the future  
Been to the future  
Been to the future  
Been to the future  
We've been to the future

Been to the future

We've been to the future
