

# Soul Reality

3

Spaceship - long trip - fat lip - fly  
I'm gonna miss you  
Back on planet Earth  
Now that I'm so high

Been a long time  
Livin' in a world of crime  
Never again, friend of a friend  
Tellin' it's a lie

Boy, I think you're way out of line  
Better luck again next time  
Never again, friend of a friend  
Tellin' it's a lie

And I don't understand  
Why'd they choose me  
The abduction of my soul reality  
How long I've been gone  
I do not really know  
But I think I see a planet below

Spaceship - long trip - fat lip - fly  
It's been a long time  
Livin' in a world of crime  
Never again, friend of a friend  
Tellin' it's a lie

And I don't understand  
Why'd they choose me  
The abduction of my soul reality  
How long I've been gone  
I do not really know  
But I think I see a planet below

And I don't understand  
Why'd they choose me  
The abduction of my soul reality  
How long I've been gone  
I do not really know  
But I think I see a planet below

I don't understand  
Why'd they choose me  
The abduction of my own reality  
How long I've been gone  
I do not really know  
But I think I see  
Think I see a planet
