

It's hard to make things easy  
And easy to make things hard  
Even when I'm not trying  
I always put up my guard

Tell me about your day  
If you tell me one thing  
Is the world still sideways  
I think I know what you mean

Sometimes I get bogged down  
You give me relief  
I wish I could link you  
To all my memories

Whatever you do  
Just know I'm always with you  
Wherever you go  
You're not alone

How did we know  
How was it we chose  
Each other in space

It's a double life  
The joy and the strife  
It goes on for days

So please tell me your stories  
I need to hear all your stories  
Like I need to breathe

Of all your belongings  
What are you most about  
Is that question too messy  
For you to figure it out

Whatever you do  
Just know I'm always with you  
Wherever you go  
You're not alone

How did we know  
How was it we chose  
Each other in space

So please tell me your stories  
I need to hear all your stories  
Like I need to breathe

Whatever you do  
Just know I'm always with you  
Wherever we go  
Let's bring it home  
Bring it home  
Let's bring it home  
Bring it

Let's bring it home
