Whoa oh prisoner
My pretty oh oh prisoner

A black ocean is the sky above Tiny lights bob what star you from

Trapped in material plane

She wants to fly and they think she's insane

But she knows what she know

Give that girl wings and that's all she wrote

Twilight zone (2x) I'm floating in the dark alone and Is there any love out here let me know

A laser lights pinpoints the top of my dome Then through my body As if Scotty's beaming up a wayward soul Mutant races in an ancient universe Dark shadows humans rhymin' in a raggae verse

It's gone if you blink
I can see it as soon as you think it

Dancehalls crystal balls
On sidewalk malls
Psychic people outdoors reading palms

I believe that you know more
To survive the dimension if four

Oh prisoner
My pretty oh oh prisoner

Look at the way she's searching Trapped in a world that's hurting So bad it makes her cry But I won't let her say good bye

Twilight zone (2x) I'm floating in the dark alone and (2x) Is there any love out here let me know No way (2x)
