

Too much in my head (In my head)
Wake up in the morning
And I got your mess inside my bed
I'm way too numb for this
I'm way too numb

I start to run
Runaway from you
Runaway from us
Run from drugs we do
Just run away
It'll be okay
Just run away
It'll be okay

I've been trapped in my
I've been trapped in my
I can't sleep at night (Oh I can't sleep)
I can't sleep at night (Help me close my eyes)

Saw the walls crashing in
And the ceilings caving in
I see stars through my roof
Think I'm way too high again
Think I lost my mind again
Think I'm losing all my friends
But it won't matter when I'm dead
(It won't matter, you need help)

In my head
I've been in my head
Can't run away from all those things you've said

Say to me
Three little words, don't play with me
When I'm gone on the road will you wait for me
Give my heart and my money and my time, how much you wanna
Feels like I'm stuck in a ditch
I can't count on my hands all my fucking addictions
But outta everything you're the one that I miss
Bottom of the bottle is where my confidence is
Better for my confidence, I
Maybe if I smoke it'll bring it back
I just burn it up, light it up, blow it out and I'm feeling num
b again
