

Can we get away from anything that makes us normal?
Can we please escape from anything that makes us normal?
Can we get away from

Can we get away from anything that makes us normal?
Can we please escape from anything that makes us normal?
Can we get away from
Can we please escape from

Aliens are on my ceiling
I hope they don't plan on leaving
I can't trust the things I'm seeing
Dreams don't end when I stop sleeping
Cartoons jumping out my TV
Wave my hands like can you see me?
Everything just seems so easy
I've gone blind but see so clearly

Can we get away from anything that makes us normal?
Can we please escape from anything that makes us normal?
Can we get away from
Can we please escape from

My mind is floating in the sky
I'm in my house, there's stars inside
I wish that there was something like
These crazy things I can't describe
The feeling of your touch is like I'm standing on a land mine
The moment that I'm over you is when you wanna spend time
Spend time and spread lies

Can we get away from anything that makes us normal?
Can we please escape from anything that makes us normal?
Can we get away from
Can we please escape from
