

## Damaged Under Sun

36 Crazyfists

Footsteps on a thousand stars  
How lost I'd become  
Damaged under sun, left burned, undone  
Don't try to save me

I found my faith in faces  
The ones that would never let you die

Thrown to the wolves  
They're circling me  
Fell sick from the swallow  
Life's lessons fall from the sky

Darkness the color suits  
I became the ghost  
Blackened are the mast, through the waves we crash  
Alone the savior

I found my faith in faces  
The ones that would never let you die

Thrown to the wolves  
They're circling me  
Fell sick from the swallow  
Life's lessons fall from the sky

In disguise upsetting  
Lonesome alive  
In disguise upsetting  
Lonesome alive  
Lonesome alive

Alone the savior  
Become the ghost

Thrown to the wolves  
They're circling me  
Fell sick from the swallow  
Life's lessons fall from the sky

Thrown to the wolves  
They're circling me  
Fell sick from the swallow  
Life's lessons fall from the sky
