

My bones caught a fever narrow and deep
It's hard to be a believer, this I believe
My heart again, old deceiver
Constant caving until the end

Wake up, I'm still taking this all in (waking up)
I'm still taking this all in (Wake up)
It's still following me, sounding like a whisper, crashing like a tree
e
It's still following me

My soul full of slivers, dirty and diseased
Hellbent a sinne, a saint I'll never be my past again
True believer
Constant caving until the end

Wake up, I'm still taking this all in (waking up)
I'm still taking this all in (wake up)
It's still following me

Sounding like a whisper
Crashing like a tree
It's still following me

It's still following me
Sounding like a whisper
Crashing like a tree
It's still following me

It's still following
It's still following me
It's still underneath my skin sucking the life
Stare down from mountains edge
Let it f*cking bleed

It's still following me
Sounding like a whisper
Crashing like a tree
It's still following me

It's still following me
Sounding like a whisper
Crashing like a tree
It's still following me

Wake up
Waking up
Wake up
