

Been Through Hell

360

You see, as kids
We came up with a genius plan, a gift
To do anything we believe we can, and this
Is a blueprint on how to be a man, now it's swish
Every time the ball leaves my hand

That's triple-doubles all day
We hit the chip when we call plays
When you break down, I'm your safe house
Blind faith on this greyhound
City lights with the moon above it
Living life, just the two of us
And I ain't selfish, you need help, shit
I'ma throw the ball so you can dunk it, that's love

Downtown as we sleep on the bus, get me up
Been on the ground, but still do what we want, hey
Lean on me 'cause we stronger as one
Fuck 'em all, I'll risk a lot till my money is up

Days when I'm stuck in, I define my shell
On my campaign, just an only child going through hell
Through landmines, I walked the trenches and still prevailed
You can knock me down, but you ain't gonna ring that bell
No band of brothers, but a dad and mother
I needed shelter, so they act to cover
I was locked in, doing back-to-backs
Had to show my cards like Baccarat
It's lonely with no homies
Did this solo, I don't owe these
People tryna control me, like oh please, you know

I've been through hell
But I'm okay 'cause you were there as well
Somebody picked me up before I fell
Now, you and I got stories we can tell, I wish you well
I'll take the weight off you
Breaking the chains in two
Together we'll make it through
Under the pale blue moon

Yeah, it's a deal, listen
You better run, run, run, Johnny, run (Oh yeah)

When you feel like (The black sheep on the bus, my Lord)
Shit is real, right? (The wolves smelling blood, yeah, yeah)
You best believe, man (And I'm the one they hunt, good God)
Yeah, here they come, so (Run, run, run, Johnny, run)
To get over them
When the bridge outta hell is broken, man
That key to your dreams is golden, man
And that boy in the mirror is holding it
My best friend is my reflection
He's had my back every second
Think of Spider-Man when he was young
Little Peter never knew what he'd become
So (Run, run, Johnny, run)

I've been through hell
But I'm okay 'cause you were there as well
Somebody picked me up before I fell
Now, you and I got stories we can tell, I wish you well
I'll take the weight off you
Breaking the chains in two
Together we'll make it through
Under the pale blue moon

Man, I been away for so long, I
Started doubting if fans are with me
Had this feeling I can't
Till I heard 'em all chanting "Sixty"
Hard to say what that feels like, I realized then
Man, it hit me
So glad on this road back
I got most fans in this standing with me
Rock bottom, I was so stuck
Wait around is what I won't do now
Ain't nobody that was coming for me
So I had to get it on my own two now
When you knowin' you the one who got it
Yo, there ain't nobody gonna slow you down
If you really wanna know now, I'ma show you how

I've been through hell
But I'm okay 'cause you were there as well
Somebody picked me up before I fell
Now, you and I got stories we can tell, I wish you well
I'll take the weight off you
Breaking the chains in two
Together we'll make it through
Under the pale blue moon
