

## Tec And A Mink

38 Spesh

I thought that we would have fun forever  
Nowadays at a funeral seems like the only time my niggas come together  
Nah, we gotta change that, beloved  
My lord, it's been a long time what's the science  
It's love. What's granted is not for times taken  
How's your daughter and your boys  
We finally agin'  
Come for real or don't come at all  
I'm with TRUST and we'll be running up these numbers 'till my numbers called  
With these broke bitches I'm unininvolved  
Know some hoes that's nymphos with they nose cause how they want it raw  
I'll kill myself before I run with y'all  
My Glock 9, and 357's related. I call them gun in laws  
For 20 years I've been unemployed  
And if I wasn't doing this I'd be running girl and pushing boy  
When the tumor took the homegirl it took my joy  
Shit got me in my own world looking [?]

It's hard being a good nigga  
It's like a full time job being a hood nigga  
Fuck it let's drink  
As a child all I wanted was a tec and a mink  
Imagine a bad bitch and a Lexus to think  
I spit a verse for all my niggas still trapped in the cage  
Everybody dying from cancer. What happened to aids  
My peoples need answers  
Nobody cares cause we at the end of the road but we just keep dancing

I'm crack from the dungeons with paint on my sleeve  
Thinking 'bout Christopher Columbus how he came with diseases  
The CDC is working against us like a fever  
Anywhere where black faces considered [?]  
The scales tipped  
Niggas on the run make the mail flip  
Whatever floats your boat  
I can make the sale ship  
Vaccinations from a needle is bread  
You know the center for disease control needed a plague  
To get the 85 to stand in line and fuck with these meds  
Propaganda on the internet you've been mislead  
The matrix  
Don't confuse my 8 points with the star of David  
And don't confuse the God with the God you made up  
Power and anger  
Police think they power rangers  
[?] the motherfucking hour changes  
My peoples need answers  
Nobody cares cause we at the end of the book but we just keep dancing
