

You shouldn't have to be this way
Because this feeling don't feel so good
You're always quick to walk away
And I keep hangin' on, fightin', but maybe I should walk away too

Everything you've asked me for
I've worked so hard to provide for you
You're making hard to breathe
Cause you keep pouring the gasoline
It's treading to the fire

When will you learn?
If you keep playing with fire
Baby we're gonna burn
So quit playing with fire
Everything that we worked for, is burning down to the floor
Cause you keep playing with fire
Everything that we worked for, is burning down to the floor

You don't have to be so cruel
Because this feeling don't feel so good
And I try I try to compromise
But everywhere I turn, there's another sign
You know how much I love you girl
But we're heading for trouble, trouble, trou-ble

Everything you've asked me for
I've worked so hard to provide for you
You never let things be, cause you keep pouring the gasoline
It's treading to the fire

When will you learn
If you keep playing with fire
Baby we're gonna burn
So quit playing with fire
Everything that we worked for (you'll never learn)
is burning down (you'll never learn) to the floor (playing with fire)
Everything that we worked for (again), is burning down to the floor

Everything you've asked me for
I've worked so hard to provide for you
You never let things be
Instead you pour the gasoline
That's treading to the fire

If you keep playing with fire
Baby we're gonna burn
Quit playing with fire
Everything that we worked for, is burning down to the floor
Quit playing with fire
Everything that we worked for, is burning down to the floor
Quit playing with fire!

Everything that we worked for, is burning down to the floor
Quit playing with fire!
Everything that we worked for, is burning down to the floor
When will you learn, until you get burned, playing with fire

When will you learn, until you get burned, playing with fire
When will you learn, until you get burned, playing with fire
Everything that we worked for, is burning down to the floor

Everything that we worked for, is burning down..
