

# Lights Out

3TEETH

Light my torch with the blaze of hell  
I writ down laws with a hammer and a box of nails  
[?] politics with chips to bear  
When the flow's all cold [?]

Living lies past your limits hope your brakes don't fail

They don't give a fuck about the pain that they will put you through  
I said lights out  
They don't give a fuck about the world and they will tear it down  
I said lights out  
They don't give a fuck about the pain that they will put you through  
I said lights out  
They don't give a fuck about the world and they will tear it down  
I said lights out

Writs of a liar

When I kill em off dead  
Leave the body in the darkness  
No [?] heartless  
Bring it back to the switchblade  
You're a God-world renegade  
Blind eyes with a light head

Stuck between a casualty  
World peace, dominate  
Breed the hate  
Swear before my image which you imitate  
Portion what you love or take  
Pistol whip the president  
Leave him in the fucking chair  
To burn in hell and let him free

They don't give a fuck about the pain that they will put you through  
I said lights out  
They don't give a fuck about the world and they will tear it down  
I said lights out  
They don't give a fuck about the pain that they will put you through  
I said lights out  
They don't give a fuck about the world and they will tear it down  
I said lights out

They don't give a fuck about the pain that they will put you through  
I said lights out  
They don't give a fuck about the world and they will tear it down  
I said lights out  
They don't give a fuck about the pain that they will put you through  
I said lights out  
They don't give a fuck about the world and they will tear it down  
I said lights out
