

What's Left

3TEETH

I can't see it, nothing left for me
Sold every lie, nothing said for free
Welcome to the end of the contest
Trapped in the shadow of our progress

I have deceived it, broke reality
Already ran it, shutdown.exe
Hunting for a godhead to transgress
Show me what the fuck is left

Repossess, you tear my flesh right from me
Eat my life and resurrect what I'll be

What's left?
Show me what's left
What's left?
Show me what the fuck is left

End of reason and all matter
Welcome to the season of moral hazard
Automation replacing your best
Time for internal source of protest
Choking on the final son of Saturn
Indigestible karmic pattern
All the keys are locked up in your chest
Show me what the fuck is left

God of death
You take my last breath from me
Reach inside and disconnect what I see

What's left?
Show me what's left
What's left?
Show me what the fuck is left
Show me what the fuck is left

Slipping through my hands as I clench the debris
There's nothing left here for you, there's nothing left here for me
No matter what I do, I can't wake from this dream
So long overdue to unplug this machine, yeah

Nothing left, only severed dreams
Visionless, sold the same routine
In your head, no one hears you scream
Your last breath, dissolving everything
Nothing left, only severed dreams
Visionless, sold the same routine
In your head, no one hears you scream
Your last breath, dissolving everything

In the end, only death is free
In the end, only death is free
In the end, only death is free
Show me what the fuck is left
What's left?
In the end, only death is free

Show me what's left
In the end, only death is free
What's left?
In the end, only death is free
Show me what the fuck is left
