

# Into The Night

4 Strings

Shining light  
another day turns into night  
eternal fire  
waited all my life

you take me away  
million miles away from here  
take me away  
find a place for you and me

you're taking me higher  
high as I can be  
you take me away  
forever you and me  
take me away

you take me away

the tears I cry  
kept them all inside  
i needed time  
to make up my mind

you take me away  
million miles away from here  
take me away  
find a place for you and me

you're taking me higher  
high as I can be  
you take me away  
forever you and me  
take me away
