Hold on to Christmas

Light the fire and trim the tree It won't be long 'til Christmas Eve So close your eyes and make believe That dreams really do come true

Manger scenes and mistletoe Christmas cards from friends we know They'll disappear like melted snow At least for another year

Watching children as they play Makes you wish that Christmas would stay

All year long just for Dreamers like me And those who believe The joy of the season would stay All year long like a December snow That just won't let go Let's hold on to Christmas this year

Long ago and far away Love was born on Christmas day A cattle stall, a bed of hay A star shining in the sky

Even as the shepherds prayed Heaven knew that Christmas would stay

All year long like a December snow That just won't let go Let's hold on to Christmas this year
