

Red Desert

5 Seconds of Summer

Red, red desert, heal our blues
I dive deeper for you
What a blessing to feel your love
Twilight promised me you

I've been asleep so long
I'm so far away
Visions I see are strong
I hear what they say
Would you leave all your fears at the edge of the world
I'll tell you again what I've told you before
I've been asleep so long, wasting away

Tell me would you pack up all your bags
Staying true to North
You're the only one I would do this for

Red, red desert, heal our blues
I dive deeper for you
What a blessing to feel your love
Twilight promised me you

It doesn't take so long to heal and replace
Demons I'm running from are begging to stay

Tell me would you pack up all your bags
Staying true to North
You're the only one I'd do this for

Red, red desert, heal our blues
I dive deeper for you
What a blessing to feel your love
Twilight promised me you

Red, red [x6]

Red, red desert, heal our blues
I dive deeper for you
(Diving deeper for you, diving deeper for you)
What a blessing to feel your love
Twilight promised me you
(All these moments with you, all these moments with you)

Pack up all your bags
Staying true to North
You're the only one I'd do this for
Red, red desert, heal our blues
I dive deeper for you
