

The image I have right now's a pretty good one
I make it up as I go along
And I la-like it better when I don't even notice
Gotta laugh cause I never clue in
To mistakes that I often walk in
and I la-like it better when I don't even know it
And you stand there, say your not happy
As if no one cares
But I do
I want you to make it through
Yes I do
Come with me we'll make it through
I believe that the answer to life
Has something to do with the will to survive
But survival for what is a brand new question
All good causes stand in front to see
That no action leads to apathy
Gotta pick one good reason for those who suffer
And you stand there, say your not happy
As if no one cares
But I do
I want you to make it through
Yes I do
Come with me we'll make it through
