

## Options

54-40

Started playing guitar when I was 13  
My only dream was to get in the scene  
Went to Berklee college dropped out really quick  
Brad called me and said hey Neil this new scene is really sick

Why don't you come home as soon as you can  
Maybe get a part time job and work on the band  
My old man signed the lease to the Econoline van  
We'll find ourselves drummer and execute the plan  
We'll eliminate the options and never ever look back

We got to play the parties in the art school scene  
Downtown was really happening back in the early 80s  
We joined with Mo Da Mu stands for modern dance music  
And music's what we do so it was natural to choose it  
We put out an EP and the rest they say is history

It's nice to know your options are behind you  
It's nice to know there's nothing else you can do  
It's nice to know, it's nice to know  
Your options are behind you

Now all these years later we're still in the scene  
Brad and I are making it we're where we want to be  
There's been some ups and downs you better believe  
To choose a life and music there's never a guarantee

I remember one day in Regina playing a show in the bar  
And up the road was Blue Rodeo so we popped and said hello  
And alone in the dressing room Keelor playing the Blues  
And I told him other than music there's no job I could do  
He looked at me and mused it's good to know your options are behind you

It's nice to know your options are behind you  
It's nice to know there's nothing else you can do  
It's nice to know you don't need to choose  
Your options are behind you

It's nice to know your options are behind you  
It's nice to know there's nothing else you can do  
It's nice to know you don't need to choose  
Your options are behind you

Nice to know  
It's nice to know your options are behind you  
Nice to know  
Nice to know  
Nice to know  
It's nice to know
