

Shade Grows

54-40

Shade grows
Shade still grows

Tell me if I start to fall deep in the well
Hear me if I start the call and toll the bell
She will talk and beauty flows out from her mouth
I signed up for duty I took the job

Shade grows
Shade still grows

I know why the lone wolf howls
I know I know
I know hunger for a friend
I know

Unleash the power of the atom and it will not do
Poke a hole in the sky it will not do
For every new born this century
Old ones must move
I signed up for duty and took this job
