

MUSTARD

6LACK

Every year more energy
It's blurring what's in front of me
Some drying out prematurely
Ooh

When the heat turns up, it can break something fragile
You could burn yourself or withstand with a callous
Not the only way, but it always seems to matter to the real world

Held it down for ten summers, like Mustard baby
With me or not, it's gon come again
New kids jumpin' off the senior stands
And they made a new wave, they getting more advanced
I done seen this whole town wiped clean
Condos bury memories of my teens
I done seen this whole town get geeked
Switched to weed from Molly for the better proolly

Held it down for ten summers like mustard baby
Held it down for ten summers, I was just a baby

Fires and rolling franchises change life before my damn eyes
I need some bands on standby
Far from the waves and sand, I need a rock to stand by
I need some bands on standby

In Atlanta with my bro dem
The only thing constant is change
I was put here to show dem
Even if I only get to show then
Emerge from the fire like ashes I'm floating
Fall to the ground that's a rebirth
Phoenix, I mean, it was offset now the scene is the greenest
Fruits of my labor just needed some sun
Grounded myself what I wanted done
I don't see the whole town wiped clean
That's when everybody leaves
Made a spot for me
No, it ain't that hard to see
I've been upside down still I turned it back around

Held it down for ten summers like mustard baby
But I know them winds gon come again
New kids jumpin' off the senior stands
And they made a new wave, they getting more advanced
I done seen this whole town wiped clean
Condos bury memories of my teens
I done seen this whole town get geeked
Switched to weed from Molly for the better probably

Held it down for ten summers like mustard baby
Held it down for ten summers, I was just a baby

Fires and rolling franchises change life before my damn eyes
I need some bands on standby
Far from the waves and sand, I need a rock to stand by
I need some bands on standby
