

If I see you again then hell froze over  
Tried to tie the ends, that's a no leaf clover  
Tried to make amends, but I don't need closure  
I don't need a friend, it's funny enemies closer  
Love is like a drug to me I'd rather be sober  
Don't know how with all this fire that my heart get colder  
But I can't let up on the gas, I need to keep my keep composure

I can't let it off  
I don't wanna be alone but I pretend it all  
Had to play it smooth like I ain't afraid of falling off  
Yeah I want it all  
Oh, oh, oh  
Yeah I didn't want you to go, oh, oh  
But I been through this before, oh, oh  
And I hope you burn slow  
I better get it before it's gone  
I feel like I been on this earth for so long  
And I really just been hurt so far

If I see you again then hell froze over  
If I see you again then hell froze over

If I see you again then hell froze over  
Tried to tie the ends, that's a no leaf clover  
Tried to make amends, but I don't need closure  
I don't need a friend its funny enemies closer  
Love is like a drug to me I'd rather be sober  
Don't know how with all this fire that my heart get colder  
But I can't let up on the gas  
I need to keep my keep composure
