

Was that your one intention, I've been second-
guessing, every single second
Too much reminiscing, trying to forget it, can't seem to forget
it
It's making my head spin
Woah, woah, shawty really got me stooping low
No returns, I'm full throttle down that road, woah
Let us burn, we're both hallow on that road, oh

Welcome to the other side
Welcome to the dark side
Welcome to the dark side
Welcome to the dark, welcome to the dark
Welcome to the other side
Welcome to the dark side
Welcome to the dark side
Welcome to the dark, welcome to the dark
Welcome to the dark side

No more purpose, just time expiring
It's not worth it, my head spiraling
Down, I can't find my way out of it
I know there's only one way out of it
But, I just know that's not an option no more, I think I'm done
Trying with you ain't an option no more, I think I'm numb
Burning in my head and heart with these thoughts, look what you
've done
You said some

Welcome to the other side
Welcome to the dark side
Welcome to the dark side
Welcome to the dark, welcome to the dark
Welcome to the other side
Welcome to the dark side
Welcome to the dark side
Welcome to the dark, welcome to the dark
Welcome to the dark side

Welcome, you the one that brought me to the dark side
Why'd you have to go and ruin my life?
What's happening, happening, happening
What was everything you showed me in the past life?
Now everything I do feels like a bad time
What's happening, happening, happening
