

I'm just another lost soul
Remember when I lost hope
I look back I came this far
Wish I knew this from the start
I just told her that I'm serious, I don't want you to feel this
I'm sorry, I had to
Leave you abruptly you think it's you but that's hardly a factor
You thought I was better with company, removed your weight then
I start to move faster
You'd always say that you love me, you lied, call your friend for
or back up

Oh yeah you brought this out
Been stuck in the blues
List of let me downs
This ain't nothin' new
Drop some Fendi now
And you wanna be cool
Sorry it don't work that
Spend it, earn right back
I'll pretend it don't hurt like that
Thinking bout my ex bitch when I'm in the next bitch, yeah I might
hurt my back
You won't get a text once I hit it, yeah I know it hurts my bad
Baby lemme flex for a minute, no don't worry karma on my back

Pick a side yeah
Baby wait right there
I don't wanna fight yeah
Lemme make it right yeah

I'm just another lost soul
Remember when I lost hope
I look back I came this far
Wish I knew this from the start
I just told her that I'm serious, I don't want you to feel this
I'm sorry, I had to
Leave you abruptly you think it's you but that's hardly a factor
You thought I was better with company, removed your weight then
I start to move faster
You'd always say that you love me, you lied, call your friend for
