

Terrified of Flight

764-HERO

Night keeps going, we keep standing still
Slight rotations, sundial on a hill
City noises, shake it down alive
We don't notice all the passing time

Okay, you can start over your life
Let's go
Alright, so you got it coming, come on
Let's go

Minutes later we don't hear a sound
Spent more on it trying to keep it down
We don't notice all the passing time

We were in the sight
Terrified of flight
Everything was right
We were in the sight

Fixed on something way beyond your eyes
Wasn't broken, didn't even try
We don't notice all the passing time

Okay, you can start over your life
Let's go
Alright, so you got it coming, come on
Let's go

We were in the sight
Terrified of flight
Everything was right
We were in the sight
Everything was right
Everything was right
Everything was right
Everything was right
