Be my lover, distance overseas not nothing, I don't feel complete nah no, but when it's you and me I love it

We can fall in love, this weed can roll itself babe, just stay with me tonight, I can get you right, let's eat from life's delights babe, yeah

Yeah and its all bout you, I don't gotta get involved with your crew, like what the hell is happening, got a real ass nigga coming back again ahh

Give a fuck about that, hit it from the back this and that, know you like the way we connect, reenact with me, come to the back with me, yes happily uh

I can feel you burnin up, just tight jeans and your bra when your shirt come up, swear I don't deserve your trust, don't know what you got me doin here to earn your touch yeah, gotta be more than lust, girl this ain't a maybe this is more of a must yeah

Uh, now I guess I gotta go, you from where it's sunny and I'm living where it snows, not the type of ice that imma put around your throat, like from Louis Saint Laurent to Balenciaga clothes I don't know

Lately I been feeling in a mode, feeling like a story that's been told, feel like it's a warning from this place full of pain, how I did this shit before you I don't know

I don't know why you've been doing boy, but you won't leave my mind

And I don't know if we will make it work, but I think that's fine

No no, cause I would go and ride with you, spend the night lose my mind for a night or two, we could do it right and good, take the time all the time just like should

I don't know why you've been doing boy, but you won't leave my mind

And its all bout you, I don't gotta get involved with your crew, like what the hell is happening, got a real ass nigga coming back again ahh
