

You found the best of me inside your feelings
The worst of me was waiting for that evening
It's just me these days, I can't say I'm great
I can't stop seeing your face on all these ceilings
You've saved me for the last time, I'm alright
I'll find somebody else to watch me die
Somebody I can push away and reel back in
Like the bait that I am, I am

So let me know, let me know when we gonna find the time
So let me know, let me know when I get a little bit wise
And if you hear me, get on the phone
Sedate me till I'm normal

Won't you be a darling, feel my rage
Let me feel fantastic, broke my cage
Hold my breath until you call my name again
I can't say what's on your mind but I know we feel the same
(The same)

(So let me know, let me know when we gonna find the time)
(So let me know, let me know when I get a little bit wise)
(And if you hear me, get on the phone)
(Sedate me till I'm normal)
