

When all the words are just conversations  
And the glitter has all but faded  
I just turn around and look what I found  
A ribbon of light  
Yeah you can take all my possessions  
As I stand with my confessions  
All of the answers to all of the questions  
Leads to you  
When my heart is breaking down  
And I can't find my way out  
When the stars are all burnt out  
You illuminate my world  
Nobody said this would be easy  
But you ignite the world I believe in  
You turn it around  
Leaving no shadows on the ground  
I've been stuck in this world going crazy  
You make me stop and look up it's amazing  
I finally see it  
All of the colors become one  
When my heart is breaking down  
And I can't find my way out  
When the stars are all burnt out  
You illuminate my world  
And when I'm lost in the crowd  
And the silence is too loud  
When the stars are all burnt out  
You illuminate my world  
You're the sun that lights my sky  
You're the neon sign that shines so brightly  
You're the firework that paints my sky at night  
When my heart is breaking down  
And I can't find my way out  
When the stars are all burnt out  
You illuminate my world  
Just let your light shine on  
Let your light shine on  
Just let your light shine on  
Let your light shine on  
Just let your light shine on  
Let your light shine on  
Just let your light shine on  
Let your light shine on  
Just let your light shine on  
Let your light shine on  
Just let your light shine on  
Let your light shine on  
Just let your light shine on  
Let your light shine on  
Just let your light shine on  
Let your light shine on  
Just let your light shine on  
Let your light shine on  
Just let your light shine on  
Just let your light shine
