

Got U

98 Degrees

We're standing on the edge
And I'm wondering if we take a step
Will we
Fall from the sky or will will learn to fly high
You just gotta believe
You were wrong to think that I could look another way
Cause you're the only one who ever meant a thing to me
I could never let you go
When you're far away, I still feel you close

So now, close your eyes
If you're ready to fall again with me tonight
Take my hand, it's alright

Don't look down, don't be afraid now
Even after everything we've been through
I'll never let you fall and through it all one thing stays true
Baby I got u
So just reach out, don't give up now
All we gotta do is make it through somehow
Here is my hand for you to hold onto
I got u, I got u

Can't help but read between the lines
Something's going on, you're saying you're alright
But don't lie
Why would you just pretend
That nothing's different
I see it there in your eyes
We always promised that we'd treat each other honestly
If you were honest you would tell me what it is you need
All my time is yours, all my love is pure
Girl you know for sure that you've got the best of me

So close your eyes
And if you're ready to fall again with me tonight
Take my hand, it's alright

So don't look down, don't be afraid now
Even after everything we've been through
I'll never let you fall and through it all one thing stays true
Baby I got u
So just reach out, don't give up now
All we gotta do is make it through somehow
Here is my hand for you to hold onto
I got u, I got u

You know you'll never have to go it alone
I'll always be by your side
And when all is finally said and done
I know we're gonna be alright

Don't look down, don't be afraid now
Even after everything we've been through
I'll never let you fall and through it all one thing stays true
Baby I got u
So just reach out, don't give up now

All we gotta do is make it through somehow
Here is my hand for you to hold onto
I got u, I got u

So don't look down, don't be afraid now
Even after everything we've been through
I'll never let you fall and through it all one thing stays true
Baby I got u
So just reach out, don't give up now
All we gotta do is make it through somehow
Here is my hand for you to hold onto
I got u, I got u
