

Sundown

A Common Year

You said, "Come meet me where the sun goes down."
You said, "Come meet me at the edge of town."
Now you look just like a teenage queen
Just slow down 'cause we're exactly where we need to be

On a night like this
I don't wanna move
We can stay right here
I just wanna be with you
When we get so close
I can feel your skin
When I'm next to you
This night will never end

So we pull over at the county line
The stars are shining like your eyes
And now I'm feeling like a teenage king
The time stops when you're next to me

And I would drive for hours just to meet you halfway
Just to spend a couple of minutes and return to where we
came
