

Circles

A Life Divided

You keep me waiting for so long, my love
I cried a thousand tears, but you didn't call
You could have seen me in the dark of night
You were too busy, so you passed me by

You make me feel, like I'm a fool of love
You always pull me down, when I stand up
And if you wonder what I do right now
I run in circles and I'm spinning round

[Chorus]

I really, really, really gotta get you out of my mind
I got to give everything, I got to give everything
I really, really, really gotta let you out of my life
I got to give everything, I got to give everything

No, I never wanted to stalk you and that is the truth
Now every mile I drive helps me to get over you
I really, really, really really got to get you out of my mind
Got to give everything
Got to give everything

I wait outside like all these nights before
Inside my car I'm staring at your door
I wonder what you might do right now
If you let me then I'll come round

[Chorus]

Hear me screaming
Keep me dreaming

[Chorus]
