

Killer by Night

A Pale Horse Named Death

Family man by the day
Killer by the night
I've been living a double life
And I guess I'll be that other guy tonight
And take a life

Hey little girl you better run from me
Lover by day, killer by the night

Lightning in one hand, a gun in the other
Driving down 87 to kill me another
And I got a long list on the back of my hand
And your name is in high demand

Hey little girl you better run from me
Lover by day, killer by the night

Got these urges in the midst of my dreams
I've got visions playing scary scenes
With all my fingers wrapped around your neck
Around your neck

Hey little girl you better run from me
Lover by day, killer by the night

All my shadows follow me
Into my heartless therapy
Just to watch you, watch you bleed
Just to hear you, hear you scream

Body bag in the back of my truck
You know you just had some shitty luck
When you meet a guy like me, a guy like me
God won't hear you when you're begging please
