

The Outside

A Thousand Horses

People will throw it in your face
The same old shit, different day
Try and tell you what to think
How to feel and what to say
But I was born to sing a different song
Let it take me right where I belong

Just a little on the outside
We all got a little rust underneath the paint
I'm done keeping it between the lines
Ain't trying to be anything I ain't
No, life ain't livin'
If you settle for a backseat ride
Grab the keys and drive
Just a little on the outside
Oh, yeah

I still bleed and dream in red
Heart of fire in my chest
Somewhere between God and grace
I found peace with my mistakes
'Cause I was born to sing a different song

Just a little on the outside
We all got a little rust underneath the paint
I'm done keeping it between the lines
Ain't trying to be anything I ain't
No, life ain't livin'
If you settle for a backseat ride
Grab the keys and drive
Just a little on the outside
Just a little on the outside
Yeah
Yeah

Taste the rain
Chase the wind
And learn to live

A little on the outside
We all got a little rust underneath the paint
I'm done keeping it between the lines
Ain't trying to be anything I ain't
No, life ain't livin'
If you settle for a backseat ride
Grab the keys and drive
Just a little on the outside
Just a little on the outside
Just a little on the outside
Yeah
