

Granite

A-Wall

Took my heart for granted
Now it's made of granite
Told me to be careful
Then you left, girl you vanished
It was only
Us two on this planet
Oh, is there room?
Yea there's plenty

I'm still feeling empty
I still feel the tension
When you catch my attention
Leave me reminiscing bout the times we don't mention
Focused on the past while my life flash
Just like that, just that fast

Long as you out this life, won't feel right
Long as we up all night, won't waste time
Long as it's you and I, I might try
Long as it's you and I, on my mind

On my mind
On my mind

Long as you out this life, won't feel right
Long as we up all night, won't waste time
Long as it's you and I, I might try
Long as it's you and I, on my mind

Long as it's you and I
I might try
Long as it's you and I
On my mind
Long as it's you and I
I might try
Long as you on my mind

Yea
Had to take my time with it
Reefa got me coughing
I just clear my mind with it
I been swimming cautious
But I'm about to dive in it
I just wanna get lost in
I just wanna get lost in
Ya

As long as you out this life
I can't even front
I can't survive
I can't even front
Might break my pride
For this real love
For this real life

Long as you out this life, won't feel right
Long as we up all night, won't waste time

Long as it's you and I, I might try
Long as it's you and I, on my mind
Long as you out this life, won't feel right
Long as we up all night, won't waste time
Long as it's you and I, I might try
Long as it's you and I, on my mind

On my mind
On my mind
On my mind
