

# Pressure

Aaron Cole

They say pressure make diamonds but I feel alot of pressure on my back latel  
y

And I wanna give up but I gotta put the world on my back baby  
I done came from alot just to get to the top like Ahhh

It's a whole lot of pressure, but I'm still applying pressure, uhhh

Ok, from the jump

Hit the squad and told em, I'm a run it up

I'm cold with it, standing next to me you better bundle up

I'm froze with it, might put all my diamonds in a slushee cup

My flow is crack, his flow is mid, tell em, you ain't dope enough

Your heart pump Kool-Aid and mine pump Dussee

Please don't talk to me cause I been up two days

How you tap dance and run away but still too lame

Gotta keep it on you cause they shooting like it's 2k

Whoa, not at me, no not at me

I'm out the way, just want the green, I'm low key (Loki)

And if I take an L, bet I learn from every lesson

First the rise, then the fall, when you buckle under pressure

They say pressure make diamonds but I feel alot of pressure on my back latel  
y

And I wanna give up but I gotta put the world on my back baby

I done came from alot just to get to the top like Ahhh

It's a whole lot of pressure, but I'm still applying pressure, uhhh

Applying pressure like I'm bleeding out

You look at me and see my life and know what he about

It's scary now,

I ain't gotta do a song again, my catalog will cover it

I heard you had the summer hot, I guess I better smother it

Back again,

Ummmm I was sitting out

Fame worse than dope, got you goofies out here chasing clout

Thumbing through them hundreds, that advance money running out

Commas turn to zero, it's the end, that's what this point about

Then that car go back to dealership

You pawning all your jewelry

And you got is memories

That's when you find humility

They come come and go but never learn from any lesson

First the rise and the fall, when you buckle under pressure

They say pressure make diamonds but I feel alot of pressure on my back latel  
y

And I wanna give up but I gotta put the world on my back baby

I done came from alot just to get to the top like Ahhh

It's a whole lot of pressure, but I'm still applying pressure, uhhh

What you know about pressure

Bullet in your body laid out on a stretcher

Doctors in the room trying to put you back together

Mind everywhere trying to keep it all together

Voices in your head like this gone make you better

You better not give up.

What you mean you can't walk

Take your bed and get up

Sure as God rose up  
On the third diz-ay  
I rose from the ashes again, like God with us  
Y'all had to adapt to the dark, I was shaped in it  
I been through so much pain in my life,  
I should be atheist  
If pressure makes diamonds,  
You looking at the great star  
And I'm doing good thus far  
Yea, big pressure

They say pressure make diamonds but I feel alot of pressure on my back latel  
y

And I wanna give up but I gotta put the world on my back baby  
I done came from alot just to get to the top like Ahhh  
It's a whole lot of pressure, but I'm still applying pressure, uhhh
