

Again

Aaron Lewis

I try when I look back, but I still just feel numb
And I see in my shadow the man I've become
All the times that I've gone down the wrong roads in life
The wrong turns I've taken the only ones I get right
I ain't one for foldin' the hand I've been dealt
All the games I've been playin', well, I forgot how it felt

To have the wind in my back and the sun on my face
The storm clouds behind me and I'm still in the race
I got my windows rolled down and the rain pourin' in
Forgot what it's like to feel good in my skin
'Cause I'd give everything to feel anything
Again

All the years chasin' sad songs, it sure takes a toll
On the ones you leave waitin', when are you comin' home?
I'm faded and jaded and frayed at both ends
And just lookin' to get high with some help from my friends

With the wind the wind in my back and the sun on my face
The storm clouds behind me and I'm still in the race
I got my windows rolled down and the rain pourin' in
Forgot what it's like to feel good in my skin
I'd give everything to feel anything
Again

Mm-mm

With the wind in my back and the sun on my face
The good Lord above me tryin' to show me the way
I got my windows rolled down and the sun's pourin' in
Forgot what it's like to feel good in my skin
'Cause I'd give everything to feel anything
I'd give everything to feel anything
Again

Well, I'd give everything
To feel anything
