

## Hymn To The Flaming Void

Abigor

carried through the absolute all-abyss  
unforgiving is the infinity of darkness  
his breath of flames surrounds and occupies all

all motion freezes to moving stasis of lava matter  
fire without end  
end of time, time for the end

slit throats cut veins rape souls eat hearts  
plunge humanity into the pits of eternity  
blood lakes black holes deep chasms  
all dimensions crumble

when mirrors crack  
sinister energy permeates  
reality melts into lentous states  
pouring over from the astral world  
the flaming void consumes

death spawns changes, senses overstrain  
the omniverse dissolves, evil reigns supreme  
Satan wields his axe  
all imploding chaos arises
