Aborym

Always is always forever  
As one is one is one  
Inside yourself for your father  
All is none all is none all is none

If I started murdering people there'd be none of you left  
If I started murdering people there'd be none of you left  
If I started murdering people there'd be none of you left  
If I started murdering people there'd be none of you left

It's time to drop all from behind us  
The illusion has been just a dream  
The Valley of Death may not find you  
Now as then on a sunshine beam  
So bring only your perfection  
For then life will surely be  
No cold no fear no hunger  
You can see... you can see

All the fuckin' pigs must die now! - So bring only your perfect  
ion  
All the fuckin' pigs must die now! - For then life will surely  
be  
All the fuckin' pigs must die now! - No cold no fear no hunger  
All the fuckin' pigs must die now! - no hunger.. you can see

If I started murdering people there'd be none of you left  
If I started murdering people there'd be none of you left  
If I started murdering people there'd be none of you left  
If I started murdering people there'd be none of you left

Always is always forever
