

Heartland

Above & Beyond

Like the sunlight falling onto snow
Like a sheet of a light
Like a sheet of white
That wraps around your body
And you lie there hidden underneath
Waiting for the flow
For the night to go
For a hand to soothe your body

I wanna see you blossom and be you
Come into your own
Reborn into a lush land
Holding onto my hand
Growing from the heartland
Growing from the heartland
Growing from the heartland

Fingers reaching feeling for the "No"
Welcomed by the light
And a life in sight
You're back into the warm days
Open mind, open mouthed
What a world
Eyes are wide and bright
You can say "goodbye"
To back-against-the-wall days

I wanna see you blossom and be you
Come into your own
See you come into your own
Reborn into a lush land
Holding onto my hand
Growing from the heartland
Growing from the heartland
Growing from the heartland

Waiting for a love that was always there
Didn't have the heart to feel it
On a carousel going nowhere
Didn't have the heart to leave it

I wanna see you blossom and be you
Come into your own
See you come into your own
Reborn into a lush land
Holding onto my hand
Growing from the heartland

I wanna see you blossom and be you
Come into your own
See you come into your own
Reborn into a lush land
Spying you from my hands
Wandering the heartland
