

Long Way To Fall

Above & Beyond

Stealing from a new day
In a summer month of Sundays
Just me and a friend
Falling from the sky

We left a room of nobodies
For a perfect field of strawberries
And a world without end
Our fingers reached the sky

And when I fly
Well I hope you're waiting for me
And when I die
I just hope you're waiting for me

'Cos it's a long way to a fall
Such a long way to fall
Such a long way to fall
Without your hands to carry me

In the chapter of the sundown
I could never get my head 'round
Two distant friends
Sharing the same sky

You never meant to know me
But you couldn't help but show me
That you had the wings
To teach me how to fly

Any when I fly
Well I hope you're waiting for me
And when I die
I just hope you're waiting for me

'Cos it's a long way to fall
Such a long way to fall
Such a long way to fall
Without your hands to carry me

And when I fly
Well I hope you're waiting for me
When I die
I just hope you're waiting for me

'Cos it's a long way to fall
Such a long way to fall
Such a long way to fall
Without your hands to carry me

Without your hands to carry me
