```
You tell me of a place you like to go
You say it will reach out and seize the sorrow
And we always mean to act on what we say
So come on, oh darling now... hurry, hurry, let's go
We're all we need, oh darling
I told you of a place that I had been
It was dark and I was supremely alone
No matter now if the compass fails again
'Cause in your love I built a home
We're all we need, oh darling
We're all we need
We're all we need
We're all we need
We're all we need
We're all we need, oh darling
Most certainly I'm where I'm supposed to be
In a molten sun; with you I am free
Today our hearts won first prize
'Cause we're wise with the feeling
```

We're all we need
