

# Kingdom

## Above This

I can taste the victory tonight  
It's right here on the tip of my tongue  
This isn't over for me until it's over for you  
And thou serpent never adder stung  
Look into the future for me baby  
Five shots got me going real crazy  
You see the townspeople worship me greatly  
And they expect me to offer them safety  
Look around tell me what you see  
A hidden valley with a castle  
Drifting into the sea  
We can't hold back the enemy any more  
Three cheers for victory  
Another army brought down  
Put into history  
Prepare our artillery  
As we wait for our enemies delivery

And this  
Is the moment that you've all been waiting for  
Under me  
There will be no fear  
No defeat  
No mercy

Fire filled battlefields  
Watch my stock reap high yields  
Let's make this music the soundtrack of war  
I warn my enemies  
Attack them mentally  
This magic fills my veins like ecstasy  
My serpents wrap around your fucking throats  
And when I'm finished  
You'll be running for the fucking boats

Bullets fly right at my face  
I raise my hand in place  
They stop in space and fall  
Straight to the ground  
So take a look at my teams  
Not backing down  
The sky is lit  
My vibrant triple crown  
Tell me we should let them flee  
Their leaders all we need  
But I'm not certain I am finished yet  
I want them all to see  
This power inside of me  
And send them running  
For the fucking hills

Unconnected you will be unto me  
Undetected I will be you will see  
Unexpected this will be unto thee  
Unprotected you will be under me

You really think that you can stop me now

I swear your petty little comments  
Make me laugh out hard  
I'll strip you down to a bone  
Then cast you into a stone  
And let these crows collect  
With what they will  
The air you breathe has gone stale  
The fires smoke you inhale  
Perfect my pigment I am not for sale  
If you still think that you can stop me now  
You can't  
This war has just begun

I am Azza  
Bow to me bow to me now  
I am Legion  
Bow to me bow to me now  
I am Forneus  
Bow to me bow to me now  
Chapter 7  
Bow to me bow to me now
