Brain Destroyer

Abscess

Lick your shit off of my bursting prick
Put on this helmet, it'll make you feel sick
Experiments tried and true, your sac turns blue
The enemy is within

Tubes connected to your eyes Fed by bags of black supplies Connectors screwed on to your ears Instilling ripping nightmare fears

Here drink this, it'll make you go nuts See through eyes of feces, dirt and guts Personalities divide, destroy and conquer Dried spit string grows longer

Tubes connected to your eyes
Fed by bags of black supplies
Connectors screwed on to your ears
Instilling ripping nightmare fears

Acid race through arteries Fuse with dust from mind disease Cruel instruments implied Pack your fears for one way ride

Scream and yell, stuck inside a skin cell Melted, rejected alienated hell Brain probe deepens, stirring up the back Soundless mouth mumbling in shock
