

Dissolve (Extended)

Absofacto

No flask can keep it
Bubble up and cut right through
But you're someone I believe in
You heat me like a filament
Anytime you're in the room
But you burned me and I'm smoking

I just wanted you to watch me dissolve, slowly
In a pool full of your love
But I don't even know how the chemistry works
When you're poolside
Kicking in the dirt, kicking in the sand
And stirring up trouble

Can't find an exit
I wander in a maze alone
If I find you, will you shock me?
Left, left and right, right
Pretty sure that I've been here before
And it isn't what I wanted

I just wanted you to watch me dissolve, slowly
In a pool full of your love
But I don't even know how the chemistry works
When you're poolside
Kicking in the dirt, kicking in the sand
And stirring up trouble

Your voice like an angel
Been chain-smoking all month long
Like you're someone I believe in
You held me, but I'm volatile
And never got my head screwed on
Now I'm melting through the floor

Am I only a lab rat?
Someone you can test things on
Are you training for a new love?
All in white like you're an angel
With the sun glimmering off your glass mask
This isn't what I signed up for

I just wanted you to
I just wanted you to

I just wanted you to watch me dissolve, slowly
In a pool full of your love
But I don't even know how the chemistry works
When you're poolside
Kicking in the dirt, kicking in the sand
And stirring up trouble

I just wanted you to watch me dissolve
I just wanted you to watch me dissolve, slowly
I just wanted you to watch me dissolve
I just wanted you to watch me dissolve, slowly
