

Capsized

Abstract

Falling fast I get smacked by the concrete
Knees scraped while I get to spittin' out teeth
Heart broke but it been like that since 17
I been getting pretty used to pouring kerosene
Over everything just to get me through the storm
That's what you do when there's nobody to keep you warm
Know I been a shelter to too many who can't do the same
Take take take from my fire till they kill my flame
Stay stay stay all I wanted anyone to do
Play play play with my heart I think I'm overdue
For someone who love me as completely as I tend to do
I get thinking bout it round the hours between 10 and 2
Wrong place wrong time who am I supposed to find
I thought it was you but you showed me you were never mine
Everything was not enough
I still got a heart but the cracks started adding up

I just wanna know how
I just wanna know how
You could take someone who just lifts up
And decide you could let them down
I just wanna know how
I just wanna know how
How you look in my eyes watch the ship capsize
And decide you can let me drown
I just wanna know how
I just wanna know how
I just wanna know

How you gonna treat me like the only one
Turn around and leave me like I never was
Tell me that you need me when you had nobody else
I'm a human not a toy you get to put back on the shelf
It's my own fault I know where I tend to look for love
It's a hell that I'm acquainted with I love it like a drug
Gonna kill me and I know it but it turned me to a poet
Water works in my eyes but it gets the music flowing

I look for light
In the darkest places
And I lose my light
To the darkest spaces

Always see the good in people who won't ever do the same
Fall in love with filling cracks like Kintsugi was a game
I go all against my logic I'm a "Sucker for the pain"
Must be something from my childhood I feel it in my veins
When I'm chasing after something that ain't easy to attain
Probably why I'm making music I'm a sucker for the chase
Always running after goals that aren't ready for the race
Think I'm running towards love but I'm running in place

I just wanna know how
I just wanna know how
You could take someone who just lifts up
And decide you could let them down
I just wanna know how

I just wanna know how
How you look in my eyes watch the ship capsize
And decide you can let me drown
I just wanna know how
I just wanna know how
I just wanna know

Oh I just wanna know
Oh I just wanna know
Oh I just wanna know
Oh I just wanna know
Oh I just wanna know
