Abstract

I guess we rode separate rides
Think they strapped me in too tight
Wanna get out this town
Take us to the beach in the rain right now
Might last an hour till we get tired, oh

Lot on my plate, lot on my chest
Lot on my neck, lot on my mind
I'm on my grind it's only right that I flex
Come through all new they can tell that I'm next
Life's cool who are you ain't a question I get
I came out the town I'm still holding em down
One of one, all for the love, catch me if I'm coming down
Say you'll catch me if I'm coming down
And I know I became the man that I told you I was gonna be
I was gonna be
And I'm told everything that shines is not gold but that's what I'm gonna be
, ya that's what I'm gonna be
If you find me in my old haze, mind state in my old ways
Remind me what I became, remind me what I became

I guess we rode separate rides
Think they strapped me in too tight
Wanna get out this town
Take us to the beach in the rain right now
Might last an hour till we get tired, oh

And I don't hope that you're lonely
I'm just glad you don't know me
I'm just glad you don't own me
Rose grew out the cracks in the concrete
What a beautiful view, living under the sun
What a beautiful life, living for what we love
And I know I became the man that I told, you I was gonna be
I was gonna be
And I'm told everything that shines is not gold but that's what I'm gonna be
, ya that's what I'm gonna be
If you find me in my old haze, mind state in my old ways
Remind me what I became, remind me what I became

I guess we rode separate rides
Think they strapped me in too tight
Wanna get out this town
Take us to the beach in the rain right now
Might last an hour till we get tired, oh

No we'll never take the same roads
No we never had the same goals
Know we never payed the same tolls
We see life at a different angles
Road less traveled you know how the saying goes

Know I worked for my spot didn't happen over night
I see youngins coming up cause I put it in there sights
I was crucial to your lane better treat my name right, that's real
