

I Could Use Some Space

Abstract

So with all that said, I'm just kinda over the spot
I'm just over the spot
You guys, do you- you know a better place than Earth? Somethin'?
Much better-er than Earth
Ooh, yeah, definitely alien; that's not... that's not how...
Say it... say it...
What!?
Say it or we're leaving you here

Can I share a secret? I'm not alright
But to put it simply, I'm fuckin' tired
Overload my senses on a global scale
And the only message: we're doomed to fail

And I know the pace feels like we're runnin' in place
If it's into the ground, I guess we're winnin' the race
Need a way off of this planet, could say I'm needin' some space
When they visit, let 'em take me away

Don't even need to stay in this dimension
I will happily take whatever I'm given
I don't think I even need to be sedated
Come on, let me in your spaceship
Anywhere but here's my favorite

Have you seen the coverage? On the nightly news
Is it parody, or am I confused?
Is the darkest timeline comin' into view?
If you know somewhere better-er, can I come with you?

And I know the pace feels like we're runnin' in place
If it's into the ground, I guess we're winnin' the race
Need a way off of this planet, could say I'm needin' some space
When they visit, let 'em take me away

Don't even need to stay in this dimension
I will happily take whatever I'm given
I don't think I even need to be sedated
Come on, let me in your spaceship
Anywhere but here's my favorite

Oh yeah, oh yeah
Oh yeah, oh yeah
Oh yeah, oh yeah
Know I could use some-
Space, drownin' in the lies
Betrayed one too many times
Humans that I've been attracting
Aim to torture my design

Don't even need to stay in this dimension
I will happily take whatever I'm given
I don't think I even need to be sedated
Come on, let me in your spaceship
Anywhere but here's my favorite

Know I could use some

Know I could use some
Space
