

I think about the last time I felt, yeah  
Then I think about everyone I helped  
Could it be the hand I was dealt, yeah  
And if I got to do this all by myself  
I will

If I got to keep surviving or fighting  
With my head above the clouds  
And if I got to keep on showing or riding  
I will  
Every time it seems I'm gonna have more chance  
All my friends begin to doubt  
Now whenever I'm told I won't or I can't  
I will, yeah

I've been living in my own head  
Demons living in my own bed  
These days I don't trip on what nobody said  
There ain't shit I gotta prove to anybody yeah  
I became a motivator, a style innovator  
Now we headed up like we on a elevator  
They say my tracks hot both sides of the equator  
And I'm never talking magazines till I'm on the fader  
But I know I'm hard on myself, say it ain't good for my health  
In the moment ain't finding wealth  
Feels like every time I make a move I'm moving in stealth  
No matter what I do it feel like nothing will help  
Till I get that apartment up in the rainiest city  
Working on beats in the morning, performing later that night  
Fly out with Drumma Craig and Blulake on a red eye flight  
We'll be playing a new city every god damn night (Let's go!)

I think about the last time I felt, yeah  
Then I think about everyone I helped  
Could it be the hand I was dealt, yeah  
And if I got to do this all by myself  
I will

If I got to keep surviving or fighting  
With my head above the clouds  
And if I got to keep on showing or riding  
I will  
Every time it seems I'm gonna have more chance  
All my friends begin to doubt  
Now whenever I'm told I won't or I can't  
I will, yeah

Wonder why I'm locked in my room  
Wonder why I ain't texting back  
Wonder why I ain't on the town  
Wonder why you heard I was home but you ain't seen me around  
I been working writing plotting knocking watching or reading  
Ain't taken for granted a single minute I'm breathing  
You know I'm working to get it till the day I ain't stressing  
Believe in putting effort even when you know it's been destined  
I got questions, I need answers  
Violence spreading like a cancer

Trying make a difference  
Through this music business know I can  
I got fans who overseas, I'm just trying give em hope  
But if I ain't ever heard they ain't ever gonna know  
I know music therapeutic more than anybody man  
We got problems in the states, state of problems outta hand  
But if they lend an ear think I could lend em a chance  
Cause I got faith in the world, I put my faith in my fans

I think about the last time I felt, yeah  
Then I think about everyone I helped  
Could it be the hand I was dealt, yeah  
And if I got to do this all by myself  
I will

If I got to keep surviving or fighting  
With my head above the clouds  
And if I got to keep on showing or riding  
I will  
Every time it seems I'm gonna have more chance  
All my friends begin to doubt  
Now whenever I'm told I won't or I can't  
I will, yeah
