

# Save My Soul

## Abstract

She wanna save my soul  
Oh, ooh, ooh

She want the pain to go away  
She want my hurtin' to dissipate  
She wanna take it all  
She said hold on when I felt gone  
She want the world to be put in my palm  
She wanna save my soul

She wanna save, she wanna save  
She wanna save my soul  
She said hold on when I felt gone  
She want the world to be put in my palm  
She wanna save my soul, yeah

I had a dream when I started they'd call me prophet for what I became  
All because I went from broken to artist  
The hardest of come-ups on this side of fame  
No, I ain't repping no Grammys but they understand me  
I'm LA to Germany known  
I've sold out stages, a couple of places  
Where I never thought I'd be able to go  
And I kept my soul for it  
Ain't a piece of me sold for it (Yeah)  
They try to blind with the shine but I know how most get it  
Turn yourself to a product, approach it like you were robotic  
Again and again, now you got it  
We'll keep on fillin' your pockets  
As long as you promise that you'll keep on stickin' to script

'Cause I want it all but I can't lose me  
When I can't hold my head high, she holds me  
And no matter how big that my dreams get  
She's the best dream that I've dreamt yet

She want the pain to go away  
She want my hurtin' to dissipate  
She wanna take it all  
She said hold on when I felt gone  
She want the world to be put in my palm  
She wanna save my soul

She wanna save, she wanna save  
She wanna save my soul  
She said hold on when I felt gone  
She want the world to be put in my palm  
She wanna save my soul, yeah

I have moments where I lose myself  
Wishing that I could be someone else  
I see their stories like warning signs  
If left up to fate, I might lose my mind  
I get so caught up designing my future that I lose time  
Watching it slip through my fingers, forgetting whose hands in mine  
When I go to war for my dreams, I know you stand by me  
I won't lose you in the crossfire; you're all I need
