We grow and fertilize the semen of hate

Ignoring our ignorance - daring our fate

Predictions were made - generations were lost

While the seed is growing day by day in front of us

We buried tolerance and our respect
Became a breeding ground for social dismay
Whatever happened to the love-generation
With black and white hand in hand side by side

So preacher don't you preach Hey teacher don't you teach

Prejudice - stop the hate

No more prejudice - I ain't losing my faith

Prejudice - stop the hate

No more prejudice - I ain't losing my faith

If we could manage just to get along

Instead of blaming each other for what's going wrong

Education is the secret - the future's in our hands

Burn the fields of hate and believe again

Teacher don't you teach
Preacher don't you preach
So teacher don't you teach me
Hey preacher don't you preach

Prejudice - stop the hate

No more prejudice - I ain't losing my faith

Prejudice - stop the hate

No more prejudice - I ain't losing my faith

Prejudice - prejudice

Judging one another by the colour of skin Carefully covering our feelings within We solve our problems with a kick in the face We're living in a world judged by colour and race

So preacher don't you preach Hey teacher don't you teach me
